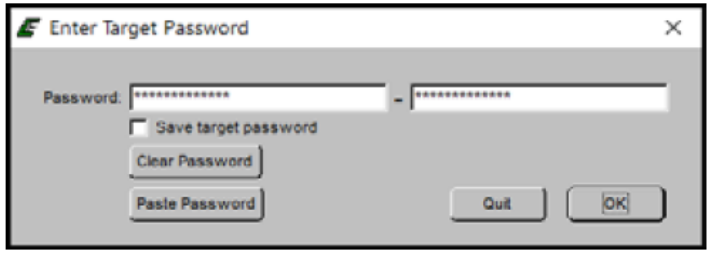
4G Display Update to Rev 688

- All MOT files compiled with version 688 or later will require a new version of 4G Display
  - New MOT files with this revision begin with the launch of the 5.0L

- The new version of the 4G Display will work for MOT files compiled both before and after the upgrade

- For older MOT files, the old passwords will still work exactly as before
  - 16-character password: B0ZW-VYVO-WNVO-FKVP
- For newer MOT files, an updated password will be required
  - 26-character passwords: WVMLDWK0OKHG3-HJGJEBLAP3HJI



- Both passwords can be saved to the computer –similar as before

- EDIS will automatically detect which password is required and apply it (assuming the passwords have been entered and saved)

- Updated Files can be found at the below link, please distribute this to all service entities and anyone else that uses the 4G display.
  - If your current 4G display is below revision 455, then download the EDIS_688A_Volume.zip file
